

Terminals and EPOS.

Made Easy.

Terminals and EPOS to suit you.

Whether you are already using an existing terminal or EPOS till to process your payments, or if you're looking to get a terminal for the first time, Card Commerce has a solution for you. We offer a range of terminals - all of which are capable of running multiple solutions and services - and have experience of integrating with many types of EPOS system.

One Terminal, Many Functions

Whichever of our payment terminals you choose to roll-out, you can rest assured that you'll get the very latest technology possible. These days, your payment terminal offers you a way to increase the types of services and solutions you offer to your customers. Gone are the days when a payment terminal only offered credit and debit card payments. Today, with any of our terminal solutions, you get access to a host of revenue generating and cost saving solutions including Gift Card, Rewards, DCC, Tax Free and more - all from a single terminal.

Integrated EPOS?

If you process credit and debit card payments through an integrated EPOS (Electronic Point of Sale) device today, we can help there too. We have integrated many of our systems with industry leading EPOS software packages and payment gateways including CBE, Axis, Sagepay, Commidea and Anderson Zaks.

A range of terminal and EPOS solutions that make processing payments and other types of transaction quick and easy

What are Terminals and EPOS?

Your terminal is the small black box through which you process your credit and debit cards today. Whilst older terminals only process credit and debit payments, newer ones can run a number of different applications and services.

If you process cards through your till then you use an integrated EPOS (Electronic Point of Sale) unit. This allows you to process payments and other services directly from your till.

Benefits to You

- More Choice**
With Card Commerce you have the option of choosing a payment solution to best suit your needs
- Industry Leading Technology**
Whether terminal or EPOS, we have access to industry leading technology that will support your business needs for years to come
- Multiple Services**
Our terminals aren't simply about credit and debit card payments. Our terminals can support multiple services in a range of different environments

Solutions for your business

Whatever your business, we have a terminal solution to suit. If you have fixed points of sale (in a shop or hotel reception, for example), our hardwired terminal is perfectly suited. If you operate in a roaming environment (maybe a restaurant or bar) then our bluetooth, cradle-based terminal is for you. And if you are more mobile or function away from telephone lines, then our mobile, GPS based terminal (which uses the same technology as a mobile phone) is the one for you. Regardless of which you choose you'll be getting industry leading technology that will support your business for years to come.
